

# OUTRIG CUPHOLDER

USER GUIDE

# INSTRUCTIONS

## ABOUT

The OutRig Cupholder is designed to attach to the X Series Chair so you never have to worry about another spilled drink around the fire. It is made out of HDPE and Stainless Steel. Perfect for holding your wine glass with the notches on the side, your cans, cups, and popping your bottles.

## USE

Slide the Cupholder onto the sidearm of your chair. Screw underneath the arm chair until it's secured. Though the Cupholder is designed for the X Series Chair, you can use it on anything with a 1 inch ledge.

## WARNING

When using a wine glass, be careful when filling the glass to the brim.

Depending on the glass size, the additional weight at the top of the fixture may cause it to be unsteady.
