OUTPOST[™]
SEAR DISC

BUILT FOR LIVE-FIRE COOKING

Add enhanced functionality and versatility to your live-fire cooking setup. The Sear Disc slides on to your Outpost Rod and is designed to compliment your Outpost™ Grill. The Sear Disc can also be used as extra space when mounted on the OutRig Post. This rugged, one-piece design gives the live-fire cook new creative options and capabilities.

USE & CARE

Slide Disc on to Outpost Rod and gently release at desired height. Adjust height or rotation by carefully lifting up and releasing pressure on the Outpost Rod.

The Discs are held to the rod through friction and gravity. The Outpost Discs require smooth movements when in use. If bumped or jarred, they can release and slide down abruptly.

Wash with dish soap and brush or dishwasher. Discs color will darken with normal use.

WARNING

Sear Disc becomes hot when cooking, and can cause severe burns. Do not touch when hot.

Avoid touching sensitive surfaces with Sear Disc when they are hot.

Weight limit 10 lbs. Do not overload Sear Disc.
