

GRILLING GLOVES

USER GUIDE

INSTRUCTIONS

ABOUT

The Breeo Grilling Gloves are high quality live-fire gloves provide excellent heat protection due to the aramid fabric layer. They are light in weight and machine washable. These gloves offer cut protection from accidental slips while cutting, and the silicone pattern on the glove allows for better grip. They are designed to withstand high heat temperatures up to 932° F.

USE

Use these gloves while preparing and cooking any food over the fire.

CARE

Store the Breeo grilling gloves in a dry place when not in use and clean by machine washing.

FOR YOUR SAFETY

Always practice safety first when using Breeo® Grilling Gloves. When using your gloves, exercise the same precautions you would with any open fire.

Do not use grilling gloves when wet to avoid the risk of steam burns.

Do not hold on to a hot surface too long. The heat will eventually penetrate if held too long. Remove glove if it overheats.
