## USE PEEL

### 1 PREP

Put flour or cornmeal on the peel under the dough to help it slide off the peel easier into the oven. We recommend shaping your dough and adding toppings with the dough on the peel.

### 2 LAUNCH

Place the peel into the opening over the pizza stone. In a smooth, quick motion, draw the peel out of the oven, allowing the pizza to slide off onto the stone.

It may take a few gentle shimmying motions to get the pizza fully off the peel and onto the stone. This is where the cornmeal or flour underneath the dough will help the transfer go smoothly.

### 3 ROTATE

After a minute or so, the crust of your pizza will have hardened a bit, so you should be able to slide the peel under the crust fairly easily. You can either use the peel to rotate the pizza within the oven or you can pull the pizza out and spin it on the peel with your hand before sliding it back in.

## CARE

Weather resistant through all seasons.  
Clean with soap and hot water.

Barkeepers Friend or SOS pad can be used to remove more stubborn dirt.

## WARNING

Peel can become hot when in use with oven.
