Crafted from durable stainless steel, this lid ensures that rain, debris, and the elements stay out of your fire pit, maintaining its pristine condition and ready-to-use state. When you're not enjoying a fire, the lid also serves as a convenient tabletop, adding versatility to your outdoor setup.

## FEATURES

**CONSTRUCTION:** Made in the USA with stainless steel

**PROTECTIVE DESIGN:** Keeps rain, debris, and other elements out of your fire pit, ensuring a cleaner and more efficient burn.

**MULTIPURPOSE USE:** Doubles as a tabletop for when your fire pit is not in use, perfect for outdoor gatherings.

# ASSEMBLY INSTRUCTIONS

## PARTS INCLUDED

Lid x1

Handle x1

Handle Screws x2

## TOOL NEEDED

Flathead Screwdriver x1

### 1 SET UP THE LID

Remove the lid, handle, and screws from the packaging. Gather a flathead screwdriver, and ideally have some slot to hold the lid in place during assembly (between your legs works great).

### 2 ATTACH THE HANDLE

Thread the screws through the lid holes into the handle with your hands.

Ensure the lid tabs are on the bottom with the handle on the top.

Once the screws are hand-tightened use the flathead screwdriver and tighten the screws in place to firmly attach the handle to the lid.

## USE

Once the fire is completely out and burned down to ash, place the lid on your fire pit. **Never use your lid as a snuffer or when the fire is burning.** Doing so can cause creosote buildup and dripping, as well as lid damage. Regularly covering your fire pit with the X Series Lid will help prevent premature aging and damage to the metal.

When your fire pit is not in use, the X Series Lid doubles as the perfect patio table.

While burning your fire pit keep your lid within reach by storing it in the 304 Dock or Dock XL.

**Please note: The 304 Dock only holds the X Series 19 or 24 Lid. Use the 304 Dock XL to store the X Series 19, 24, or 30 Lid.**

## CARE

To clean the stainless steel components, we recommend your favorite stainless steel cleaner and a soft cloth.

## WARNING

*Always wait until the fire has burned down to ash only, with no wood or large coals left in the fire pit.*

Putting the lid on your fire pit while it's burning can damage the lid from the heat causing discoloration and warping, as well as causing creosote drips to form on your fire pit and the surface it is placed on. Creosote cools to a hard, tar-like substance that is difficult to clean off any surface and can cause corrosion and discoloration.

Your lid is manufactured of heavy-duty, high-quality stainless steel, so handle it with care to ensure that it is not dropped or scraped against any body parts.

*The X Series Lid edges may be sharp.*

Care should be taken at all times to ensure that it is handled safely by individuals strong enough to keep it from damaging anyone or anything else in your backyard.
